

INKREDIBLE®

GOOD NEWS FIX 9355

Fountain solution for coldset web offset presses with turbo or brush dampening systems

9355 09

for water with a
bicarbonate content
up to 250 mg/l

9355 19

for water with a
bicarbonate content
above 250 mg/l

Application

INKREDIBLE GOOD NEWS FIX 9355 was developed specifically for use on web offset newspaper printing presses with non-contact dampening units. Fountain solution delivery to the printing plate can be considerably reduced. INKREDIBLE GOOD NEWS FIX 9355 is suitable for all types of printing plates.

Special properties

- Very fast clean running plates and enhanced plate protection
- Formation of a stable, thin film of fountain solution due to a specific reduction of surface tension
- Considerable reduction in the build-up of paper debris on the blanket
- Effective corrosion inhibitors offer excellent protection for materials
- Suitable for all types of printing plates

Despite the good buffer effect of INKREDIBLE GOOD NEWS FIX 9355, two versions are available in order to permit adjustment of all types of tap water qualities to the range between pH 5,0 and 5,3 that is most favourable for printing.

Quantity to be added

The recommended addition for use is 2 %
