print solutions

# Print Solutions

hubergroup 

.02

# Print Solutions are our speciality

- **Focus areas:** Printing inks for solvent-based, water-based, UV-curing, conventional offset, and web-offset systems as well as metal decoration, varnishes, coatings, fountain solutions, and non-ink products for commercial, packaging, newspaper or security printing
- Mixing stations and manufacturing plants **around the world**
- **Global** product availability
- **Innovative, sustainable, high-quality** as well as **reliable** products and solutions
- Worldwide **distribution and sales network** with more than 150 offices and representatives

# Print Solutions

## Product portfolio

### Flexo / Gravure

Solvent-based ink series / process inks

Water-based ink series / process inks

Energy-curable inks

Opaque white inks

Metallic and pearlescent inks

Coatings, lacquers, varnishes, primers

Auxiliaries, additives

### Sheet-Fed Offset

Sheet-Fed conventional ink series / process inks

Sheet-Fed UV ink series / process inks

Branded spot inks

Metal decoration inks

UV and water-based coatings

Mixing systems

Fountain solutions

Auxiliaries, additives

### Web Offset

Coldset ink series / process inks

Heatset process inks

Fountain solutions

Auxiliaries, additives

Non-ink products

# Colour services in real-time

- Our technology for colour measurement and colour formulation enables a **perfect colour result**
- **Colour services:** colorimetric analyses, data preparation, proofing, printing press adjustments, CtP calibration
- **Global support** throughout the entire printing process (from development to ready-to-use ink) to ensure batch-to-batch **consistency** and **quality**
- **Professional, software-based workflow** for more precise accuracy in colour measurement
- **Digital colour communication** for rapid adjustments in the printing process thanks to our own software products

# Chemicals

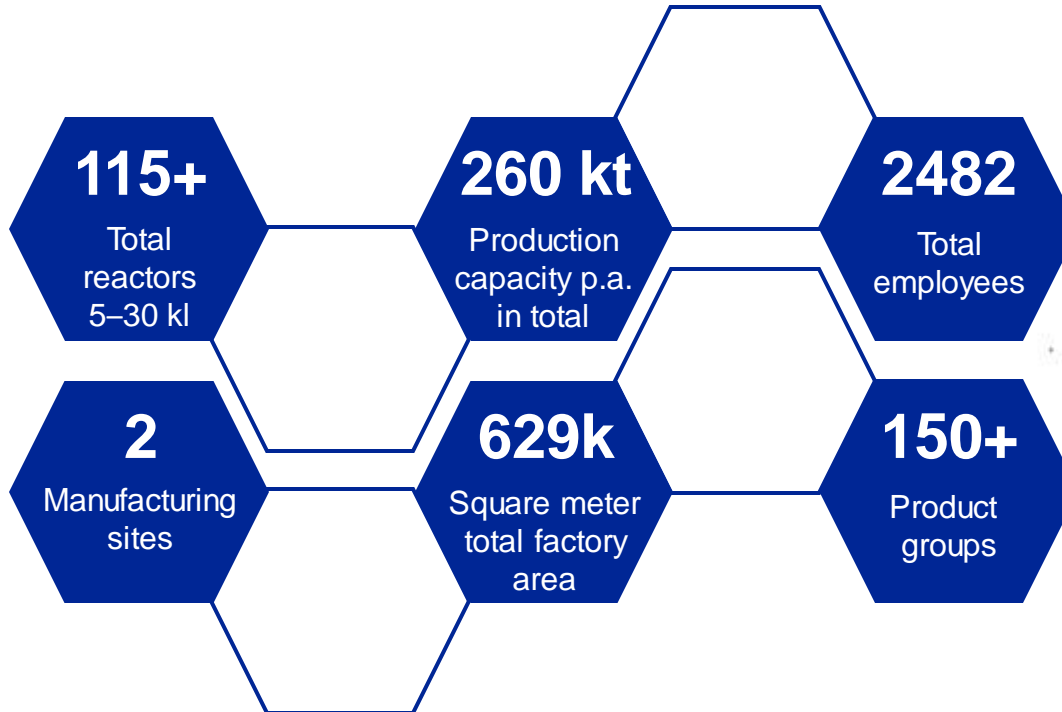

.03

# Chemicals a natural reaction

- **R&D hub** co-located at key production site in Daman
- **Focus areas:** UV-curable oligomers, polyurethanes, and lamination adhesives
- **Dedicated specialists** with long experience enable outstanding product development
- Reformulations to **meet customer-specific requirements**
- **Extended support** at client site possible
- **Services:** Consulting and support, analytical laboratory, and trainings

# Our manufacturing sites in India

# Chemicals

## Product portfolio

### Resins

- UV-curable oligomer
- Polyurethane
- Modified rosin
- Ketonic
- Polyamide
- PVB

### Lamination adhesives

- 2-component PU (solvent-based)
- 2-component PU (solventless)

### Colourants

- Pigment concentrate
- Heatset
- Coldset
- Sheetfed conv.
- Sheetfed UV
- Alkali blue

### Additives

- Adhesion promoter
