

INKREDIBLE®

GOOD NEWS FIX 9385

Fount concentrate for coldset web offset presses with brush and centrifugal dampening systems

9385 09

for water with a bicarbonate content up to 250 mg/l

9385 19

for water with a bicarbonate content above 250 mg/l

Application

INKREDIBLE GOOD NEWS FIX 9385 was developed specifically for use on web offset newspaper printing presses with non-contact dampening units (brush, and turbo dampening system). It helps to quickly establish a stable ink/water balance and contributes to rapid clean running plates. Fount solution delivery to the printing plate can be considerably reduced.

Special properties

- Very fast clean running plates
- Formation of a stable, thin film of fountain solution due to a specific reduction of surface tension
- Good protection of printing plates
- Considerable reduction in the build-up of paper debris on the blanket
- Effective corrosion inhibitors offer excellent protection for materials

Despite the good buffer effect of INKREDIBLE GOOD NEWS FIX 9385, two versions are necessary in order to permit adjustment of all types of tap water qualities to the range between pH 5,0 and 5,3 that is most favorable for printing.

Quantity to be added

The recommended addition for use is 2 %

Classification

Safety data sheet available on request

How supplied

220-kg plastic drums
600-kg IBCs
1000-kg IBCs
