

INKREDIBLE®

Perfect-Dry-FIX

Fountain solution for alcohol free printing

8320 09

for water with a hydrogen carbonate content up to 250 mg/l

8320 19

for water with a hydrogen carbonate content above 250 mg/l

Application

This fountain solution was developed specifically for use on high-speed sheet fed offset printing presses with alcohol dampening units to print alcohol free. If alcohol is used, the concentration should not exceed 5%.

Special properties

- Formation of a thin, even and stable film of dampening solution due to the specific reduction of surface tension.
- Contain wetting agent with high dynamic effect
- Very quick control response ink/water
- Printing plates run clean very fast.
- Suitable for all type of plates
- Special buffer system prevents ink roller stripping caused by deposit of insoluble salts.

Despite the good buffer effect, the use of different varieties of Perfect-Dry-FIX is recommended when water qualities with different hydrogen carbonate content are used. In case of doubt as to which product should be used, we are offering the service of a free water analysis.

When using Perfect-Dry-FIX, dampening rollers designed for alcohol free printing should be used. Please ask your roller manufacturer.

Quantity to be added

The recommended concentration for use is 3-4%.
